RGE (Royal Golden Eagle) Group

RGE's vision is to be one of the largest, best-managed and sustainable resource-based groups, creating value for the community, country, climate, customer and company. We are united by a common purpose to improve lives by developing resources sustainably.

RGE (Royal Golden Eagle) manages a group of resource-based manufacturing companies with global operations. Our work ranges from the upstream, comprising sustainable resource development and harvesting, to downstream, where our companies create diverse value-added products for the global market.

Our commitment to sustainable development, conservation and community development underpins our operations, as we strive towards what is good for the community, good for the country, good for the climate, good for the customer, and good for the company.

RGE was founded by Sukanto Tanoto in 1973 as RGM. The assets held by RGE companies today exceed US\$35 billion. With more than 80,000 employees, we have operations in Indonesia, China, Brazil, Spain and Canada, and continue to expand to engage newer markets and communities.

Riau Ecosystem Restoration: Finding Purpose in Adversity: An Asian Story

A project initiated in 2013 that emphasised responsible peat landscape management for economic returns, employment, and biodiversity preservation. Despite a history marred by environmental controversies, APRIL's parent company, Royal Golden Eagle, made a pivotal turn to commit to transparency and substantial investments in sustainability. RGE's journey explored the coexistence of Indonesia's plantation business sector with nature restoration goals.
